

CONFIDENTIAL

OIT-11448-85

18 APR 1985

25X1 MEMORANDUM FOR: [REDACTED]
 DA Planning Officer

25X1 FROM: [REDACTED]
 Chief, Domestic Networks Group, OIT

25X1 SUBJECT: KY-71 (STU-II) Requirements [REDACTED]

REFERENCE: DDA 85-0200 dated 16 January 1985

25X1 1. We have reviewed the reference and believe that the Office of Personnel requirement listed as the DA's number one priority should be acted upon as soon as possible as the Agency recruiting program has agency wide application. We in the Office of Information Technology (OIT), along with our colleagues in the Office of Communications (OC) and other offices are very much aware of and share the need to speed up the recruitment process. The installation of KY-71's at the nine field Recruitment Activity Centers (RAC) should help to reduce the lengthy delays currently being experienced. [REDACTED]

25X1 2. We plan to meet the requirement in two phases. Phase I will be the installation of the KY-71 to provide secure voice only. Phase II would be the installation of a facsimile device approved to process classified information. The phased approach is being taken because there is presently no TEMPEST approved facsimile other than the DACOM 412F, which because of its size, is not considered a candidate system. The Communications Security Division and Engineering Division, OC are actively pursuing the development of an approved secure facsimile configuration and we are hopeful that one can be available for field deployment within the next 6 - 9 months. [REDACTED]

25X1 SUBJECT: KY-71 (STU-II) Requirements [REDACTED]

25X1 3. In order to get things moving, we would appreciate being
25X1 advised who the OP point of contact is in order to begin a dialogue
25X1 with the customer. We need to better define and understand the
25X1 requirement, and at the same time, share our views on how we plan to
bring the effort to fruition. The DNG point of contact is [REDACTED]
[REDACTED] is assigned to the Operations Branch. Field
Facilities Division, DNG/OIT and can be reached on [REDACTED]

25X1 MEMORANDUM FOR: [REDACTED]

Chief, Domestic Networks Division, OC

DD/A REGISTRY

25X1 FROM: [REDACTED]

DA Planning Officer

FILE: 90-5-1

SUBJECT: Directorate of Administration Secure Voice Telephone Unit (KY-71) Requirements

REFERENCE: Memo to C/PS/MS/DDA from C/DND/OC, dated 10 December 1984, Same Subject

1. Attached are the (STU-II), KY-71 requirements for the Offices of the Directorate of Administration as requested in reference. Each responding office has listed their individual requirements and provided justification for their secure voice and/or data needs.

2. The Office of Personnel's (OP) objective to provide a speedier method of processing applicants for employment would be greatly enhanced by a quick and secure method of transmitting personal history and other applicant information to Headquarters from their field recruitment offices. The KY-71's data/facsimile capabilities would provide OP the opportunity to meet this requirement; consequently, it is ranked as the DA's top priority for KY-71 allocation.

25X1 3. The Office of Training and Education's (OTE) need for a secure voice upgrade at [REDACTED], ranks as the Directorate's second priority for secure voice needs. OTE has attached to their response a copy of a Domestic Network Division study, completed in 1983, relative to these needs.

25X1 5. The order above, highest to lowest priority, constitutes a Directorate order of priority as requested in reference. However, if a target of opportunity arises within OC's installation schedule to service any of the requirements submitted by the individual offices, the priority order may be discarded and the opportunity should be taken accordingly.

All Portions CONFIDENTIAL

25X1 [REDACTED] CONFIDENTIAL [REDACTED]

OTE 84-1506

28 December 1984

MEMORANDUM FOR: DA Planning Officer

FROM: [REDACTED]

OTE Plans Officer

SUBJECT: Requirements for Secure Telephone Units
(STU-II), KY-71REFERENCE: Memo to Multiple Addressees fm DDA (84-3676),
dtd 18 Dec 84, Same Subject

1. In response to your referenced memo, I am attaching a copy of the study that was done [REDACTED] by the Office of Communications/Domestic Networks Division early in 1983. I have highlighted all references to the KY-71 as well as the KY-3 equipment which OC recommended be replaced with KY-71 equipment (13 systems total).

2. This communications upgrade at [REDACTED] has the highest priority within OTE. We have been requesting this upgrade through the OC Program Call exercise for at least the past three years that I am aware of. The existing equipment is not sufficient to handle the requirements for secure conversations. Just try to get a call through [REDACTED] on one of their two green numbers and you will see what I mean (they are constantly busy). The KY-71s will provide [REDACTED] with reliable, on-base secure voice communication that is long overdue.

3. As you are aware, this package (of which the KY-71s are only a small portion) is in OC's FY 1986 budget (unless it gets cut) but anything that can be done before that date is sorely needed and will assist [REDACTED] in keeping up with their burgeoning demands. Please let me know if there is any further information I can provide.
